# THE GREAT WALL OF CHINA

THE HISTORY OF THE GREAT WALL OF CHINA

The Great Wall of China is one of the most famous and longest man-made structures in the world. It stretches over 13,000 miles across the northern borders of China, protecting the Chinese Empire from invasions by nomadic peoples from the north.

The wall was built in several stages over centuries, with the most significant construction occurring during the Ming Dynasty (1368-1644). The wall is made of brick and stone, and is surrounded by a series of watchtowers and烽火台 (beacon towers).

The Great Wall of China is a symbol of Chinese civilization and a testament to the ingenuity and perseverance of the Chinese people. It is a UNESCO World Heritage Site and a major attraction for tourists from around the world.
